Appl. No. 09/851,587 Amendment Dated January 5, 2005 Attorney Docket No.: ONX-117A

AMENDMENTS TO THE CLAIMS

Kindly cancel claims amend claims 4, 6, 8, and 9 and cancel claims 3, 5, 7 and 26-29 as shown in the listing of claims below. This listing of claims will replace all prior versions, and listings of claims in the application.

5 LISITING OF CLAIMS

- 1. A method for measuring a position of a micro machined optical element, comprising:
- a) disposing at least one magnetic sensor on the micro machined optical element;
- 3 b) exposing the at least one magnetic sensor to a magnetic field; and
- c) measuring a change in a property of the at least one magnetic sensor as the position of the micro machined optical element changes.
- 6 wherein the micro machined optical element includes a moveable portion and the at least
- 7 one magnetic sensor is disposed on the moveable portion,
- 8 wherein the micro machined optical element includes a fixed portion and at least one
- 9 sensor further includes one or more magnetic sensors disposed on the fixed portion, and
- wherein the fixed portion includes a base and the magnetic sensor that is disposed on the
- 11 fixed portion is disposed on the base.
- 2. (original) The method of claim 1 wherein the magnetic sensor senses a magnetic field that is
- 2 used to actuate the micro machined optical element.
- 1 3. (cancel)
- 4. (currently amended) The method of claim [[3]] 1 wherein the at least one magnetic sensor is
- selected from the group consisting of, magneto resistive sensors, giant magnetoresistance
- 3 sensors, colossal magnetoresistance sensors, anisotropic magnetoresistance sensors, magnetic
- 4 tunnel junction devices, Hall effect sensors, flux sensing coils, magnetostriction sensors and
- 5 magneto optic sensors.
- 1 5. (cancel)
- 6. (currently amended) The method of claim [[5]] $\underline{1}$ wherein the magnetic sensor disposed on
- the fixed portion is disposed on a sidewall of the fixed portion.
- 1 7. (cancel)

Appl. No. 09/851,587 Amendment Dated January 5, 2005 Attorney Docket No.: ONX-117A

- 8. (currently amended) The method of claim [[5]] 1 wherein the fixed portion includes a top 1 chip and the sensor is disposed on the top chip. 2
- 9. (currently amended) The method of claim [[5]] 1 wherein the sensor that is disposed on the 1
- movable portion and the sensor that is disposed on the fixed portion are electrically coupled 2
- in a bridge circuit 3
- 10. (original) The method of claim 9 wherein the bridge circuit is a Wheatstone bridge circuit. 1
- 11. (original) The method of claim 1 wherein the magnetic sensor senses a sense magnetic field 1
- that is separate from a magnetic field that actuates the micro machined optical element. 2
- 12. (original) The method of claim 11, wherein a magnetic structure disposed on the micro 1
- machined optical element creates or changes the magnitude or direction of the sense 2
- 3 magnetic field.
- 13. (original) The method of claim 12, wherein the at least one magnetic sensor is selected from 1
- the group consisting of, magneto resistive sensors, giant magnetoresistance sensors, colossal 2
- magnetoresistance sensors, anisotropic magnetoresistance sensors, magnetic tunnel junction 3
- devices, Hall effect sensors, flux sensing coils, magnetostriction sensors and magneto optic 4
- 5 sensors.
- 14. (original) The method of claim 12 wherein the at least one magnetic sensor includes a 1
- magnetoresistive sensor characterized by a serpentine shape. 2
- 15. (original) The method of claim 12 wherein the at least one magnetic sensor includes two or 1
- more magnetic sensors. 2
- 16. (original) The method of claim 15 wherein the two or more sensors are coupled together in a 1
- 2 bridge circuit.
- 17. (original) The method of claim 16 wherein the bridge circuit is a Wheatstone bridge circuit. 1
- 18. (original) The method of claim 11 wherein the micro machined optical element includes a 1
- moveable portion wherein the moveable portion is moveable with respect to an axis. 2

Appl. No. 09/851,587 Amendment Dated January 5, 2005 Attorney Docket No.: ONX-117A

- 1 19. (original) The method of claim 18 wherein the magnetic material is disposed substantially
- 2 parallel to the axis.
- 20. (original) The method of claim 19 wherein the at least one sensor includes a magnetoresistive
- 2 sensor;
- wherein the magnetoresistive sensor has a "C" shape having a gap;
- wherein, in at least one position of the moveable element, the magnetic material is disposed
- 5 within the gap.
- 1 21. (original) The method of claim 18 wherein the magnetic material is disposed substantially
- 2 perpendicular to the axis.
- 22. (original) The method of claim 21 wherein the at least one sensor includes a magnetoresistive
- 2 sensor;
- 3 wherein the magnetoresistive sensor has a "C" shape having a gap;
- wherein, in at least one position of the moveable element, the magnetic material is disposed
- 5 within the gap.
- 1 23. (original) The method of claim 1, further comprising:
- 2 measuring a temperature; and
- 3 compensating for a change in the property of the at least one magnetic sensor with
- 4 temperature.
- 24. (original) The method of claim 23, wherein the compensating step includes determining a
- 2 relationship between the property of the magnetic sensor and the measured temperature.
- 25. (original) The method of claim 23, wherein the compensating step includes regulating the
- temperature to maintain the temperature within a desired range.
- 1 26-29 (cancel)
